#### Notes:

1. All data NOT specially mentioned are measured at 230Vac/ 50Hz input, full load and 25°C of ambient temperature
2. The ripple current must be measured under the condition of AC coupling & 20MHz bandwidth. (Rated input and rated output) ; The actual value will depend on LED lighting module.
3. Derating may be needed under low input voltages. Please check the static characteristics for more details
4. Measured at 120V/230Vac input, full load
5. The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
6. FSP40-ZZAP1(035)VG Safety Pending
