## OUTPUT SPECIFICATIONS
- **Output voltage/current:** 9V/4.44A
- **Total output power:** 40W
- **Protection:**
  - Over voltage: The adapter will enter into shut down that means no output while over voltage happened at output terminal that caused by internal fault, the output trip voltage shall not exceed 16 volts. That will be return to normal state by AC reset.
  - Short circuit & Over current: When an internal fault occurs, or an external fault is applied to the output, the power supply shall shut down and enter auto-recovery mode.
  - Over temperature: The power supply will enter into shut down while the abnormal thermal rise occurs. That will be return to normal state by AC reset.
  - Brown-out: Set at 50Vac~60Vac
